

Denie Hiestand - The Body Electrician
Your Spring Health Tune Up - Victoria April 2010

Spring is almost here and Denie will be returning to Victoria in April for 3 days of private clinic sessions. Due to his busy world wide client demand, I am uncertain when he will be returning again, so this is a perfect opportunity to be electrically and vibrationally "re-tuned".

" Our life force energy is a subtle form of electro-magnetic energy. It is the animating current of life, without which we do not exist. This life force energy flows through our body in an invisible wiring system, charging every cell in its path. When this electrical current becomes weakened or partially blocked, we can experience illness, pain, emotional upsets and physical malfunction. The cells in our body work electrically not chemically - therefore illness or disease is the result of low electrical energy.

"There is not a disease state that is not evident in the body's electro-magnetic energy fields prior to its physical manifestation. The frequency we vibrate at gives us our physicality." *Excerpt from Electrical Nutrition by Denie Hiestand.*
